DISPOSAL OF NON-CORE ASSETS AND CARRIAGES

DISPOSAL OF FPC'S NON-CORE ASSETS (PASSENGER CARRIAGES)

The annual inventory carried out as at 1 October 2019 comprised an effort to identify non-core assets – passenger carriages – based on the criteria set out in the protocol of the working group on non-core asset management dated 21 August 2019. Criteria for being recognised as non-core assets: the asset was not involved in transportation for three years and has no prospect of being used in FPC's operations.

As at 1 October 2019, a total of 201 passenger carriages worth RUB 1,211.5 million were identified, including:

- 116 baggage carriages, after FPC terminated its baggage transportation activities
- 79 RIC carriages manufactured in 1980–1994 intended for passenger transportation on international routes not suitable for operation on domestic routes and not required on international routes due to lower demand, and failing to meet modern requirements

- 6 carriages of a non-standard design (dining carriages and generator cars) with centralised power supply, which cannot be used for transportation since other types of carriages of this design were retired as they reached the end of their service life.

In Q4 2019, 37 baggage carriages were disposed of. As at 31 December 2019, 164 carriages were recorded on FPC's books.

FPC plans to write off 20 carriages in 2020; carriages are selected and sold to Russian Railways entities upon their requests.
